

WHAT IS CLAIMED IS:

1. A bankruptcy practice credit manager internet system, which comprises:

(a) at least one manager processor computer, each of said at least one manager processor computer having a conventional microprocessor having a central processing unit with operating system hardware and software for conventional microprocessing, including sufficient hardware and software to operate on the internet and having connection to operate on the internet, said at least one manager processor computer being functionally connected to an internet system and having secured access to a bankruptcy practice program on a host server;

(b) a plurality of creditor processor computers, each of said creditor processor computers having a conventional microprocessor having a central processing unit with operating system hardware and software for conventional microprocessing, including sufficient hardware and software to operate on the internet and having connection to operate on the internet, said plurality of creditor process computers being functionally connector to said internet system and having access to said bankruptcy practice program on a host server;

(c) an internet system, including at least one host server, said at least host server having said bankruptcy practice program with a homepage and with sufficient software to:

(i) provide to said at least one manager processor computer access to said bankruptcy practice program, secured access to said program to set up individual bankrupt client case files, which are secured to prevent any other users from write functions with respect thereto, editing capabilities, and input and transmittal capabilities for notices;

(ii) provide to said plurality of creditor processor computers access to said bankruptcy practice program, limited access to said program to provide informational access, claimant creditor information sheet inputs and valid voting capability for plans, and to deny said plurality of creditor processor computer access to secured manager processor computer write functions.

2. The bankruptcy practice credit manager internet system of claim

1 wherein said at least one manager processor computer and said plurality of creditor processor computer include e-mail capabilities for communication with one another via said host server.

3. The bankruptcy practice credit manager internet system of a plurality of claim 1, which further includes third party processor computers, which are provided read only access to said bankruptcy practice program via said at least one host server.

5

4. The bankruptcy practice credit manager internet system of claim 3 wherein said plurality of third party processor computers includes e-mail capabilities, via said host server for communications with at least one of said at least one manager processor computers and said plurality of creditor processor computers.

10

5. The bankruptcy practice credit manager internet system of claim 1, wherein said bankruptcy practice program home page includes general case information and links to individual debtor and case information files.

15

6. The bankruptcy practice credit manager internet system of claim 1, wherein said bankruptcy practice program includes access for said plurality of creditor processor computers to plans of reorganization for bankrupt clients having plans of reorganization, including documents, links, and plan information.

20

7. The bankruptcy practice credit manager internet system of claim 1,
wherein said home page includes selection options for contacting said at
least one manager processor computer.

5 8. The bankruptcy practice credit manager internet system of claim 1,
wherein said bankruptcy practice program provides access to claims
motions.

10 9. The bankruptcy practice credit manager Internet system of claim 1,
wherein said bankruptcy practice program includes access to recent case
developments.

15 10. The bankruptcy practice credit manager internet system of claim 9,
wherein said bankruptcy practice program includes accessing individual
bankrupt client files by claim number or case number identification.

11. A bankruptcy practice credit manager internet system, which
comprises:

20 (a) at least one main manager processor computer having a
conventional microprocessor having a central processing unit
with operating system hardware and software for conventional
microprocessing, including sufficient hardware and software to
operate on the internet and having connection to operate on the

internet, and being functionally connected to an internet system
and having a level one top security access to a bankruptcy
practice program with exclusive access to write and edit specified
aspects of said bankruptcy practice program;

5 (b) a plurality of sub-manager processor computers, each of said
plurality of sub-manager processor computers having a
conventional microprocessor having a central processing unit
with operating system hardware and software for conventional
microprocessing, including sufficient hardware and software to
10 operate on the internet an having connection to operate on the
internet, said plurality of sub-manager processor computers
being functionally connected to an internet system and having a
level two secured access to said bankruptcy practice program
with access to write and edit only counsel-related aspects of said
15 bankruptcy practice program;

(c) a plurality of creditor processor computers, each of said
creditor processor computers having a conventional micro-
processor having a central processing unit with operating system
hardware and software for conventional microprocessing,
20 including sufficient hardware and software to operate on the
internet an having connection to operate on the internet, said
plurality of creditor process computers being functionally
connector to said internet system and having a level two secured

access to said bankruptcy practice program with access to write and edit only creditor-related aspects of said bankruptcy practice program;

(d) an internet system, including at least one host server, said at least host server having a bankruptcy practice program with a homepage and with sufficient software to:

(i) provide to said at least one main manager processor computer access to said bankruptcy practice program, level one secured access to said program to set up individual bankrupt client case files, which are secured to prevent any other users from write functions with respect thereto, editing capabilities and input, and transmittal capabilities for notices, hearings and dispositions

(ii) provide to said plurality of sub-manager processor computers access to said bankruptcy practice program, level two secured access to said program to set up individual bankrupt client case files, which are secured to prevent any other users from write functions with respect thereto, editing capabilities and input, and transmittal capabilities, and with exclusion to level one secured access;

(iii) provide to said plurality of creditor processor computers access to said bankruptcy practice program,

level three access to said program to provide
informational access, claimant creditor information sheet
inputs and valid voting capability for plans, and with
exclusion to level one and level two secured access.

5

12. The bankruptcy practice credit manager internet system of claim
11 wherein said at least one main manager processor computer said
plurality of sub-manager processor computers and said plurality of
creditor processor computer include e-mail capabilities for
communication with one another via said host server.

10

13. The bankruptcy practice credit manager internet system of a
plurality of claim 11, which further includes third party processor
computers, which are provided read only access to said bankruptcy
practice program via said at least one host server.

15

14. The bankruptcy practice credit manager internet system of claim 13
wherein said plurality of third party processor computers includes e-mail
capabilities, via said host server for communications with at least one of
said at least one main manager processor computers, said plurality of
sub-manager processor computers and said plurality of creditor processor
computers.

20

15. The bankruptcy practice credit manager internet system of claim 11, wherein said bankruptcy practice program home page includes general case information and links to individual debtor and case information files.

5

16. The bankruptcy practice credit manager internet system of claim 11, wherein said bankruptcy practice programs include access for said plurality of creditor processor computer to plan of reorganization for bankrupt clients having plans of reorganization, including documents, links, and plan information.

10

17. The bankruptcy practice credit manager internet system of claim 11, wherein said home page includes selection options for contacting said at least one manager processor computers.

15

18. The bankruptcy practice credit manager internet system of claim 11, wherein said bankruptcy practice program provides access to claims motions.

20

19. The bankruptcy practice credit manager internet system of claim 11, wherein said bankruptcy practice program includes access to recent case developments.

20. The bankruptcy practice credit manager internet system of claim 19,
wherein said bankruptcy practice program includes accessing individual
bankrupt client files by claim number or case number identification.
